

EME International Seminar Series

Net-metering and a gift that you will be happy to have it returned

PANAGIS VOVOS

Assistant Professor
Department of Electrical and Computer Engineering,
University of Patras, Greece

Abstract:

This seminar will first present the most popular charging schemes for electricity prosumers. Their properties, advantages and disadvantages for RES-based installations will be briefly described. This introduction will build a case why net-metering became such a popular billing mechanism of prosumers world-wide. An internet platform will be presented, which assists prosumers (or consumers that consider generating) in maximizing the potential profit from the net-metering billing mechanism. The platform will be presented by Doctoral Researcher Giannis Giannakopoulos.

Thursday, 24 November 2022 15:15 – 16:15 (JST) Online (Zoom)
